

Hostile Input Toolchain Smoke Test

The Analyst Mind - DEF CON 34, Malware Village

What this page is

A control. It exists so you can prove your triage kit is installed and working before you sit down in the room. It carries no technique.

What this page does not contain

No document-open action. No script object. No attached file.
No hidden text layer - every line here is drawn in the normal render mode and comes back out of a text extractor unchanged.
No form, no encryption, no compressed streams.

Document metadata

Title: Hostile Input Toolchain Smoke Test
Author: The Analyst Mind
Subject: Inert control document for pre-workshop QA
Producer: gen_smoke.py
Created: 2026-07-28

The metadata above matches this body exactly. A differential check between the extracted text and the document information dictionary should come back empty.

Expected result

file, pdfid, pdf-parser, pdftotext and qpdf all read this without warnings, and every structural counter reads zero. Anything else is a problem with your install, not with the document.

Generated by gen_smoke.py. Inert by construction.
